## **Program**

The course starts at **09:30** sharp, with a brief theory session discussing the correct handling techniques, safe removal protocols, and the importance of crowd control.

We then move onto the practical session where we will be covering the use of snake tongs and buckets and snake tongs and tubes. We will break at around 13:00 for lunch and then move onto hooking and tailing venomous snakes and practising real life snake removal scenarios.

Snakes used for the handling session vary but we usually make use of the following species: Puff Adder, Cape Cobra, Forest Cobra, Snouted Cobra and/or Rinkhals.

**Dress code:** Those doing the venomous snake handling should wear long trousers and closed shoes. On hot days please bring along a hat.
