DANGEROUS

Bibron's Stiletto Snake
(*Atractaspis bibronii*)

DANGEROUS

Rhombic Night Adder
(*Causus rhombeatus*)

HARMLESS

Common Slug-eater
(*Duberria lutrix lutrix*)

MILDLY VENOMOUS

Black-headed Centipede-eater
(*Aparallactus capensis*)

HARMLESS

Bibron's Blind Snake
(*Afrotyphlops bibronii*)

HARMLESS

Rhombic Egg-eater
(*Dasypeltis scabra*)

MILDLY VENOMOUS

Short-snouted Grass Snake
(*Psammophis brevirostris*)

MILDLY VENOMOUS

Spotted Skaapsteker
(*Psammophylax rhombeatus*)

HARMLESS

Cape Wolf Snake
(*Lycophidion capense capense*)

MILDLY VENOMOUS

Herald or Red-lipped Snake
(*Crotaphopeltis hotamboeia*)

HARMLESS

Brown House Snake
(*Boaedon capensis*)

HARMLESS

Aurora House Snake
(*Lamprophis aurora*)

HARMLESS

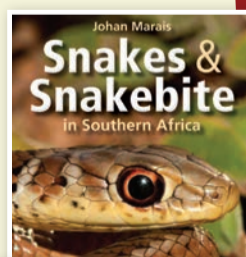

Olive Snake
(*Lycodonomorphus inornatus*)

CAN INFLECT A NASTY BITE

Mole Snake
(*Pseudaspis cana*)

JOHAN MARAIS is the author of various books on reptiles including the best-seller *A Complete Guide to Snakes of Southern Africa*. He is a popular public speaker and offers a variety of courses including **Snake Awareness**, **Scorpion Awareness** and **Venomous Snake Handling**. Johan is accredited by the International Society of Zoological Sciences (ISZS) and is a Field Guides Association of Southern Africa (FGASA) and Travel Doctor-approved service provider. His courses are also accredited by the Health Professions Council of South Africa (HPCSA).

EMERGENCY PROTOCOL

IN THE EVENT OF A SNAKE BITE

- 1 Keep the victim calm, immobilized and transport the victim to the closest hospital **without delay**.
- 2 If the victim stops breathing, resort to artificial respiration or make use of a Bag Valve Mask.
- 3 Call the Poison Information Centre help-line for further advice: 0861 555 777.

DO NOT

- ... apply a tourniquet.
- ... cut and suck the wound.
- ... use ice or very hot water.
- ... give the victim alcohol.
- ... apply electric shock.
- ... inject antivenom randomly.

Antivenom (if required) must be administered by a doctor in a hospital environment.
