DANGEROUS

EMERGENCY PROTOCOL

IN THE EVENT OF A SNAKE BITE

VERY

DANGEROUS

- 1 Keep the victim calm, immobilized and transport the victim to the closest hospital without delay.
- 2 If the victim stops breathing, resort to artificial respiration or make use of a Bag Valve Mask.
- **3** Call the Poison Information Centre helpline for further advice: 0861 555 777.

DO NOT

- ... apply a tourniquet.
- ... cut and suck the wound.
- ... use ice or very hot water.
- ... give the victim alcohol.
- ... apply electric shock.
- ... inject antivenom randomly.

Antivenom (*if required*) must be administered by a doctor in a hospital environment.
