

HARMLESS

Brown Water Snake (*Lycodonomorphus rufulus*)

Maximum Length:
97 cm

Other names:
Bruin Waterslang

A smallish snake averaging 30-50 cm with a maximum length of 97 cm. It is light to dark brown with a salmon-pink to yellow coloured belly. Snakes from the Western Cape are often much darker. This snake is not as aquatic as the Dusky-bellied Water Snake but does frequent rivers, streams, vleis and other damp areas. It is active at night and swims well but is often seen hunting along shaded streams during the day. It is a powerful constrictor and feeds on frogs, tadpoles, fish and occasionally nestling rodents and geckos. Females produce 6 – 23 eggs in summer. Though harmless this snake is much feared in Zulu culture and is called Ivuzamanzi elimdubu.
