

DANGEROUS SNAKES OF CAMEROON

Cameroon has a large variety of snakes. Around seventeen species of snakes are highly venomous. About sixteen are venomous but not deadly. The majority of snakes encountered are either mildly venomous or harmless to humans.

HIGHLY VENOMOUS

Has caused human fatalities.

VENOMOUS

Painful bite, but does not require antivenom.

EMERGENCY PROTOCOL

IN THE EVENT OF A SNAKE BITE

- 1 Keep the victim calm, immobilized and transport the victim to the closest hospital **without delay**.
- 2 If the victim stops breathing, resort to artificial respiration or make use of a Bag Valve Mask.
- 3 Call the Poison Information Centre help-line for further advice: +27 861 555 777.

DO NOT

- ... apply a tourniquet.
- ... cut and suck the wound.
- ... use ice or very hot water.
- ... give the victim alcohol.
- ... apply electric shock.
- ... inject antivenom randomly. Antivenom (if required) must be administered by a doctor in a hospital environment.
