## **EMERGENCY PROTOCOL**

IN THE EVENT OF A SNAKE BITE

1 Keep the victim calm, immobilized and transport the victim to the closesthospital without delay.

2 If the victim stops breathing, resort to artificial respiration or make use of a Bag Valve Mask.

## DO NOT —

... apply a tourniquet.

... cut and suck the wound.

... use ice or very hot water.

... give the victim alcohol.

... apply electric shock.

... inject antivenom randomly. Antivenom (if required) must be administered by a doctor in a hospital environment.
